Telemedicine Clinic

**Healthcare that
fits your life**

Telemedicine for Your Business

Discover Canada's Largest Telemedicine Provider

Appletree's Telemedicine Program

Welcoming an Appletree Telemedicine site into your business allows you to connect patients in your community to an experienced physician right from your location, a convenient way for patients to receive care and refill prescriptions under one roof. By partnering with Appletree, you will have the opportunity to provide your customers access to one of Ontario's largest networks of physicians, 7 days a week, including evenings and weekends. Let us show you how our turn-key Telemedicine program can help you grow your business and turn it into THE medical hub of your community.

Grow Your Business

Whether patients choose to visit us via Telemedicine, in-clinic, or remotely with Virtual Care, Appletree physicians have secure and private access to their centralized charts throughout our network. Patients appreciate this level of continuity of care, and flexible ways to connect with their physicians. As part of our network, your Telemedicine site will benefit from this growing and loyal customer base. Our program may also provide growth opportunities for successful sites to scale from Telemedicine to full Appletree Medical Centres.

Improving Access to Health Care

Appletree Telemedicine is now found in many remote or underserved communities across Ontario such as North Bay, Chatham-Kent, and Akwesasne. We provide services that improve access to community healthcare for Ontarians throughout our province who would otherwise have little means to receive the care they need.

Partner with Industry Leaders

As one of the early users of this technology, Appletree is the #1 leader of Telemedicine services in Canada, with over 60 locations in Ontario. Our service guarantees:

- Experienced team members, trustworthy solutions
- Physician-based group with more licensed doctors than any other provider
- Competitive rates, quality equipment & premium service
- Growth opportunities from Telemedicine clinic to full-size Appletree Medical Centre
- Industry-leading training & patient care
- Partnership with Appletree, a recognized healthcare brand for over 30 years
