

“With high scalability, patient satisfaction and ease of use, every healthcare professional must incorporate this technology into their practice. Virtual Care is already transforming the healthcare sector, and will soon be the principal way that patients access primary care.”

- Dr. Thom Tyson MD, CEO, Appletree Medical Group

## Choose Appletree As Your Virtual Care Partner

### We can help healthcare professionals like you.

We have helped thousands of healthcare professionals, groups and businesses like yours connect patients, clients and employees to a doctor. We make it easy, safe and convenient for the communities you serve to receive medical care - virtually.

Let's partner together on the journey to Virtual Care.

## Healthcare Solutions for Your Business

Virtual Care Solutions

# Canada's Leader in Community Healthcare Innovation

## Expand Your Virtual Capabilities, Enhance Care for Your Community

Appletree Medical Group has the experience, the technology, and the doctors to help you provide Virtual Care safely and reliably to patients across Canada, while driving growth and value opportunity for your business. Our broad network of physicians, and advanced Virtual Care platform, offers providers and employers with a number of opportunities to expand their access to healthcare services. Our services extend well beyond our Virtual Care platform; any Appletree patient can access their medical record through a free online portal, and see any of our doctors in-person at one of our many Medical Centres.

## Appletree Virtual Care

Our team of physicians and specialists will work closely with your healthcare providers, staff and business leaders to provide medical services to your patients, employees and clients - whenever and wherever they are needed. Here's why so many providers are eager to partner with us:

- 150 + licensed Canadian family doctors & specialists, many offering Virtual Care services
- Comprehensive charting & connectivity between virtual and in-clinic services
- Same-day appointments, 7 days a week
- Secure & private platform with phone & video appointments
- Medical advice, prescriptions, refills, referrals, medical forms & COVID-19 assessment
- Detailed reporting including throughput & scheduling
- Co-branded Virtual Care landing page & marketing collaterals

## Virtual Care & COVID-19

Virtual care services are essential to ensuring that patients receive continuity of care during a pandemic. Our service connects thousands of patients with our doctors. By safely connecting to a doctor from home, patients can avoid unnecessary trips to medical offices and emergency rooms.

## Virtual Solutions for Healthcare Professionals, Hospitals, Employers & Pharmacy Partners

### Extend Your Coverage & See More Patients

Our network provides you with extended physician coverage for patients across Canada, whether they are insured by public or private insurance plans, or living in rural, remote or underserved regions.

### Reduce Unnecessary Emergency Visits

Appletree Virtual Care helps hospitals divert low-acuity patients away from emergency rooms, thereby reducing wait times and freeing up front-line staff.

### Patient Overflow Support

During the recent pandemic, demand for healthcare services and physician availability were difficult to predict. Appletree Virtual Care provides our clients with revenue sharing opportunities and a network of experienced doctors available to handle your patient overflow - whether it's due to vacations, emergencies, maternity leaves, or retirements.

### COVID-19 Pandemic Screening

Appletree physicians are supporting communities during the COVID-19 pandemic by screening patients who are ill, or suspect that they may have been exposed to the virus, thereby decreasing the probability of exposure and transmission for healthcare workers.

### Strengthen Pharmacy-Clinic Partnership

Virtual Care provides our pharmacy partners with remote access to a physician, ensuring that patients can obtain the prescriptions and refills they need, while improving medication adherence.

### Enhance Your Employee Benefits

Enhance your company's health benefits plan, at no additional cost, by giving employees a powerful tool to help them stay healthy and productive. Virtual Care appointments are quick and can be completed from an employee's home or office, thereby reducing absenteeism.
