

Appletree Well Baby Appointments

Appletree's Well Baby Program is here to support you in ensuring your baby's healthy development and growth.

Our physicians will answer your questions and provide the medical care you need for your baby, from routine appointments to ensuring your baby is meeting all the proper milestones.

Appletree Pediatricians

Appletree's pediatricians are available via Virtual Care or in-person appointments at select Appletree Medical Centres. Our pediatricians provide care to patients from birth to age 18 and will require a referral from a family physician for more complex conditions. At some locations, a pediatrician is available without a referral for infants, children and adolescents requiring routine medical care.

Well Baby Program

Why Should I Book My Baby for a Well Baby Visit?

Well Baby appointments are important for ensuring your baby is healthy and meeting their milestones. They also provide an opportunity for you to ask any questions you may have about caring for your baby. At Appletree, Well Baby appointments are offered by both family physicians and pediatricians, who are specialists in children's health. Pediatricians diagnose and treat a wide range of childhood illnesses for patients from birth to approximately age 18.

What Can I Expect at a Well Baby Appointment?

When you arrive for your visit, we will weigh your baby and measure their length and head circumference. This information is plotted on a chart, and reviewed to track your child's growth and development. The doctor will then complete a head-to-toe physical exam and administer your child's vaccines if scheduled.

We will assess your child's progress and help you, as a parent, understand the important role you play in your child's development.

What If I Have Concerns about Childhood Vaccinations?

Recommended childhood vaccinations have proven to be safe and effective at preventing serious childhood diseases. This can be a sensitive subject for some new parents and it is best to discuss your concerns with your physician.

Do I Need to See a Pediatrician?

Most family physicians provide excellent medical care to patients of all ages. If they feel your child would benefit from seeing a pediatrician, they will request a consultation on your behalf.

How Can I Access the Information From My Visit?

Parents and caregivers may access their children's medical results, reports and vaccination records online via our Appletree Patient Portal. Our portal is secure, confidential and accessible from anywhere, at any time.

Visit us at AppletreeMedicalGroup.com/Patient-Portal to register or access your account today.

Well Baby Schedule & Immunizations

Appointments Schedule

The standard schedule for visits is:

1-2 weeks	9 months
1 month	12 months
2 months	15 months
4 months	18 months
6 months	2 years

Once your child is five years old, they will see a doctor every 1-2 years until they are 18 years old.

Immunizations

Vaccines are administered during your Well Baby visits according to the Ontario Routine Immunization Schedule. Immunization is a safe and effective way of protecting your child, and your community, from communicable diseases. The following vaccines are offered:

Rotavirus	Mumps
Tetanus	Rubella (German Measles)
Diphtheria	Pneumococcal disease (Pneumonia)
Pertussis (Whooping Cough)	Meningococcal disease (Meningitis)
Polio	Varicella (Chicken Pox)
Influenza (seasonal)	Measles
Haemophilus Influenza type B (Hib)
