Appletree Virtual Care

What is Virtual Care?

Virtual Care allows you to connect to an Appletree doctor via video or phone. You can use your smartphone or log onto your computer from the comfort of your home or office.

Is There a Cost for Virtual Care?

Virtual Care services are covered under OHIP for all Ontarians with a valid Ontario health card (dental care excluded). When creating your profile for your Virtual Care appointment, you will be asked to provide your OHIP number and version code. Additional fees may be required for sick notes and other forms.

Patients without OHIP coverage must pay for Virtual Care services. Standard service fees are charged and will be clearly communicated to you as you book your appointment. You may be eligible for reimbursement through your company or university benefit plan or through your home province.

Can I Get a Prescription through Virtual Care?

Yes! Your prescription may be emailed to you or can also be faxed automatically to the pharmacy of your choice. When creating your account, you will have the opportunity to provide the name and fax number of your preferred pharmacy.

Which Device Can I Use to Connect to My Appointment?

You can connect to your Virtual Care appointment using a smartphone, tablet or desktop computer. Both telephone and video appointments are available.
